December 2, 1987

Ms. Kathy Pica
American Nuclear Society
555 N. Kensington Avenue
La Grange Park, IL 60525

Dear Kathy:

This letter is to authorize release of \$500 from the Thermal-Hydraulics Division discretionary account for a contribution to the Lamarsh scholarship fund, as per the Division's amended 1987 budget. I would also like to confirm the release of \$100 for student travel to Los Angeles that was "pre-authorized" as per an earlier letter. Finally, the Division Executive Committee has again "pre-authorized" an expenditure of \$100 for student travel to each of the ANS national meetings in 1988 (San Diego and Washington D. C.).

I believe that this releases all funds committed in the budget for 1987, with the exception of the \$2000 that the Division committed for the production of a handbook for Division members. It appears that the book will not be completed before the end of 1987, and so we may have to reallocate the funds for expenditure in 1988.

Please call me if you have any questions.

Sincerely,

Alan E. Levin
Division Treasurer

S. A. Levin

URGENT

To ensure acknowledgment of sponsors, the registration brochure will contain a listing of contributors and proper recognition will be paid to them at the conference. Industry representatives would also be welcomed for judging of paper presentations. If you have any questions regarding the conference, please feel free to contact me at (404) 894-3720, or our Student Branch Faculty Advisor, Dr. Alan Levin, at (404) 894-3746. Thank you for your consideration.

Sincerely,

I. Kevin Buchanan
General Chairman

I. Kevin Buchanan

THERMAL-HYDRAULICS DIVISION

TREASURER'S REPORT

NOVEMBER, 1987

The Division is in excellent financial condition at this time. As of our latest financial report from ANS Headquarters, our discretionary fund balance is \$9502, with our \$100 contribution for student travel to the Dallas conference not yet costed. Our major expenses for the year have not yet been debited, including the awards that will be presented at this conference. Furthermore, we must make our budgeted allocation to the ANS scholarship funds, as shown in our revised 1987 budget, a copy of which is attached. According to my projection, we will finish 1987 with a balance of slightly over \$6000; this number is subject to change, since several items have not yet been finalized, specifically, the cost to produce the Division Manual, the amount spent for awards, and the income from the Division luncheon at this conference.

As required, the Division budget for 1988 was submitted in July to ANS Headquarters. It is also shown on the attachment. Beginning with this budget, I have changed the way in which the individual items are listed, so as to make clear which monies can be carried forward indefinitely (income from topical meetings) and which cannot be so treated (member allocations and luncheon income). Although ANS does not detail I recommend that future treasurers take the risk of

PROCEDURES - DIVISION TREASURER THERMAL-HYDRAULICS DIVISION

This document describes the function and duties of the Treasurer of the Thermal-Hydraulics Division of the American Nuclear Society, and provides a set of procedures for the performance of those duties.

FUNCTION

The Division Treasurer maintains the financial records of the Division, and acts as the primary liaison between the Division and other organizations within ANS, including ANS Headquarters, with regard to financial matters. The two major responsibilities of the Treasurer in fulfillment of these functions are:

1. Keeping an up-to-date set of financial books;
2. Preparation of the Division discretionary budget for submission to ANS Headquarters.

Specific duties and procedures required to satisfy these functions are discussed later in this document.

DIVISION FUNDING

The Division does not maintain an independent financial account from which it can draw funds directly. Instead, these funds are held by ANS Headquarters and are credited to the Division to support discretionary expenditures. The sources of these funds are:

1. Membership allocations from ANS Headquarters (at \$1.00/Division member/year);
2. Topical meeting income;
3. Other income, such as profits from Division luncheons at ANS national meetings;
4. Special allocations by ANS Headquarters, to be used for specific projects.

Of these sources, only the second is permanent; that is, once topical meeting income is credited to the Division account, it is the Division's to spend as it sees fit, and in such time as is desired. The other sources of income can only be carried over in full for a maximum of one year after the fiscal (or calendar) year in which they are credited (fiscal and calendar years coincide). If the total of the carryover of items 1 and 3 from the previous year and the membership allocation from the current year exceeds twice the current year membership allocation, the amount credited to the Division is reduced to twice the current year membership allocation.

Records of the Division discretionary account are maintained by ANS and the Division Treasurer, as described in the next section.

DUTIES AND PROCEDURES

1. Financial Records

The Division's financial records are kept in a notebook or file. In order to maintain a complete and accurate account of Division financial actions, these records should include copies of all communications between the Division and other ANS entities, and such outside organizations as the Division deals with directly. Such communications include (but are not limited to):

- a. Division budgets;
- b. Letters to ANS Headquarters amending or modifying the Division budget;
- c. Requests for funds from student branches or local sections;
- d. Requests for authorization of expenditures from Division committee chairmen (required for non-budget items);
- e. Requests to ANS Headquarters for the drawing of checks against Division funds in answer to requests described in item c, or for payment of bills or pledges as authorized in the budget or as detailed in Item d;
- f. Division financial reports prepared and distributed by ANS Headquarters;
- g. Reports on the financial status of the Division, as presented at Division Executive Committee meetings;
- h. Communications to and from Topical Meeting officers regarding financial matters;
- i. Any other material that bears upon Division finances not specifically called out in Items a-h.

2. Budget

The Division budget is required to be submitted to ANS Headquarters by August 1 of each year. The budget format contains information on:

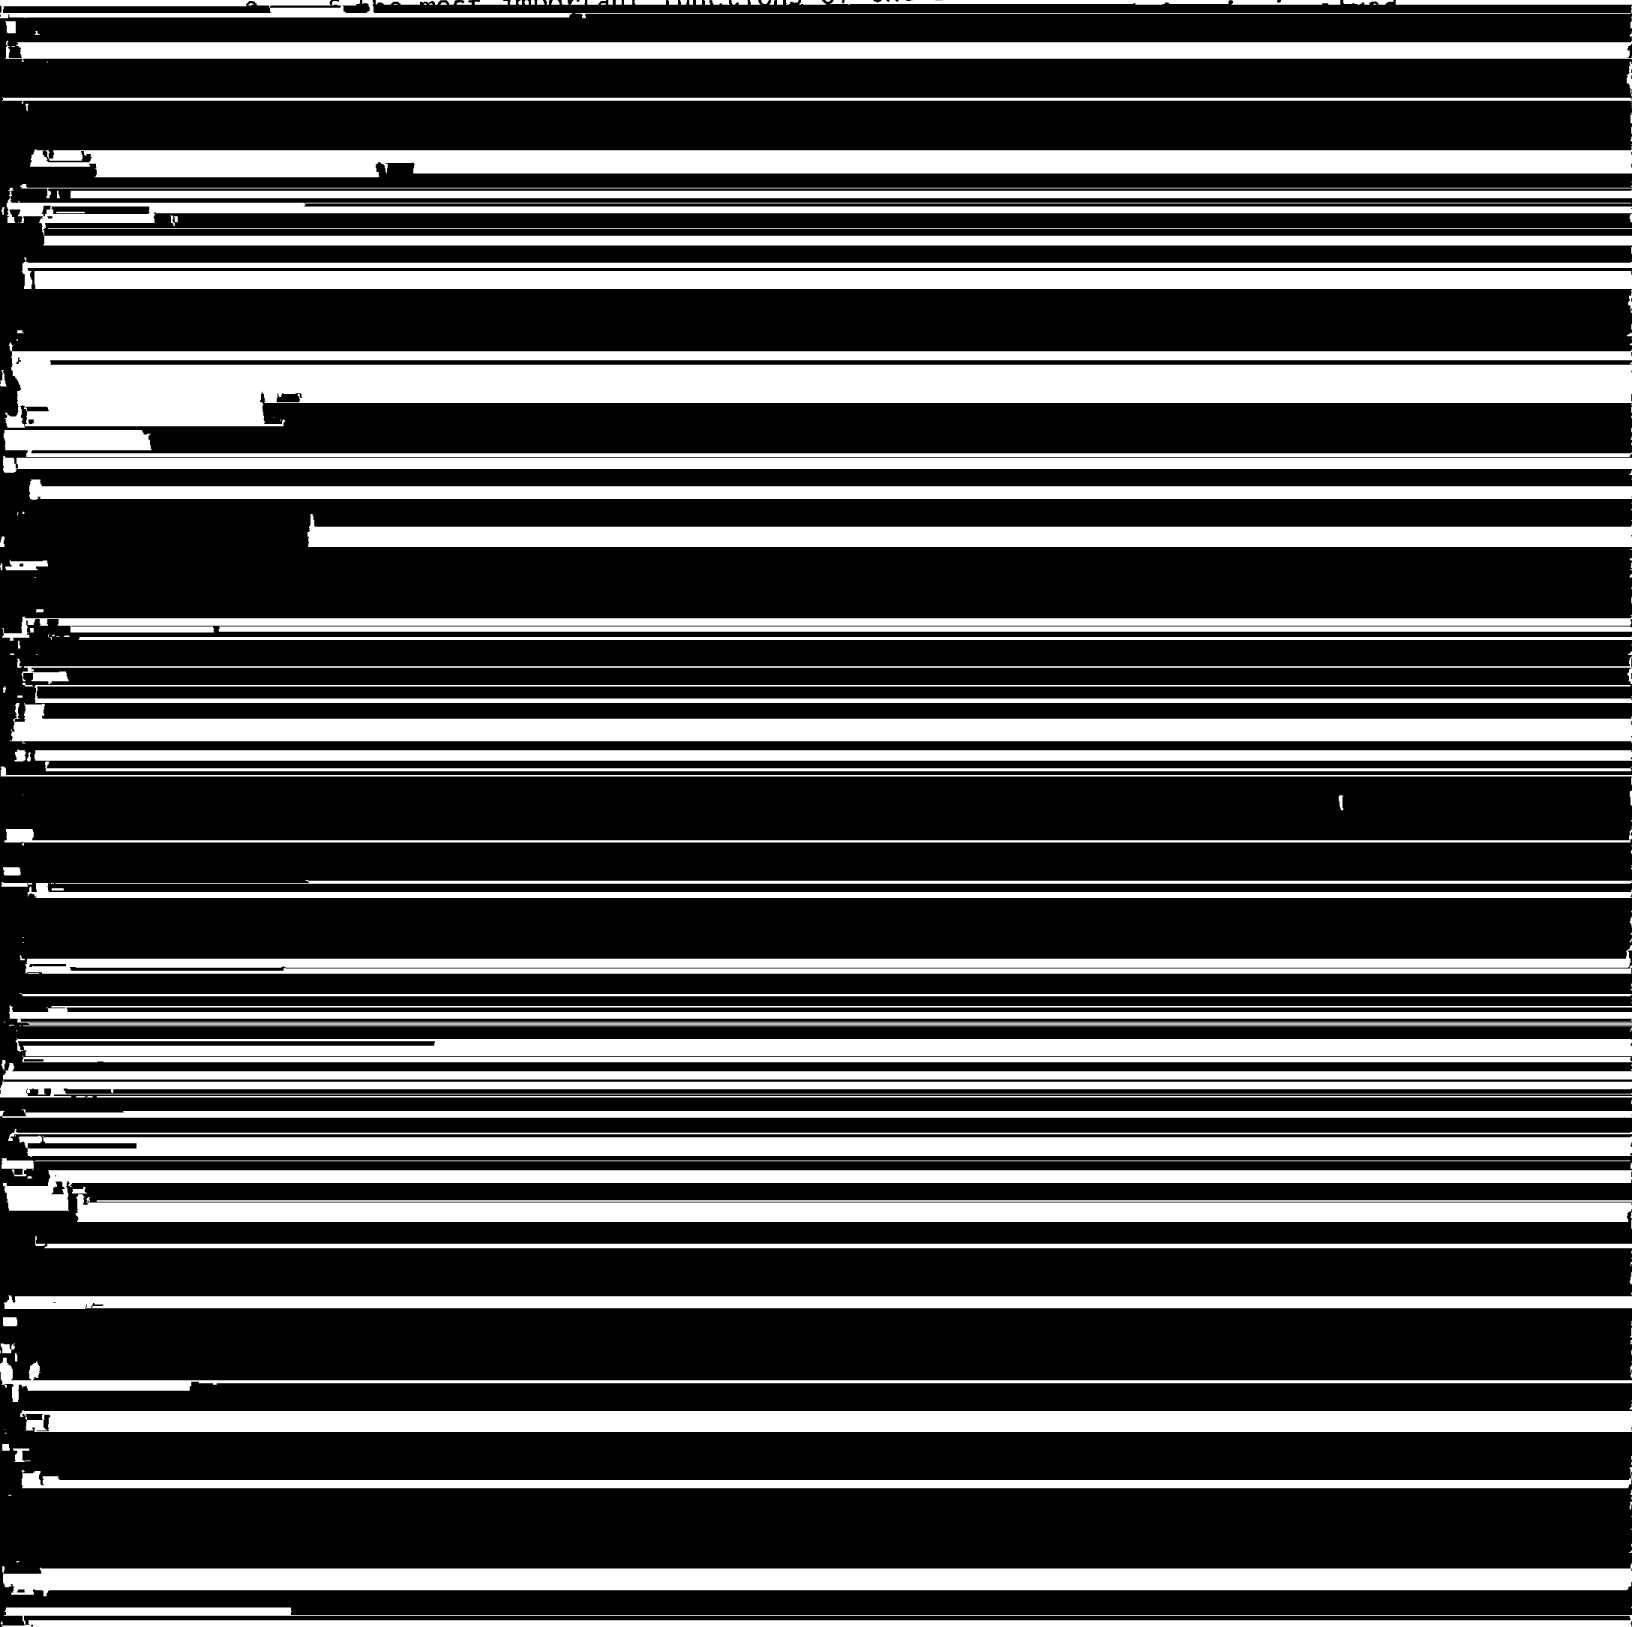

- a. Actual income and expenditures for the two years prior to the year in which the budget is being submitted;
- b. The budget for the current year as submitted and approved by ANS Headquarters in the previous year (including any subsequent amendments or modifications);
- c. A forecast of the actual expenditures for the current year, based on updated information from ANS on membership allocations and other income, and any revised topical meeting figures;
- d. A proposed budget for the coming fiscal (calendar) year. This budget includes an estimation of income from coming year membership allocations, planned topical meetings, and other sources, plus carryover funds consistent with the current year's forecast (Item c); it includes as expenditures those items approved by the Executive Committee.

A sample of the most recent budget is included as an appendix to this document.

ANS local sections, student branches, Divisions, etc. in any matters concerning Division finances. No specific duties or procedures are listed for this function, since most of the contacts described occur on an ad-hoc basis.

5. Topical Meeting Liaison

One of the most important functions of the Division is the sponsorship of

Dear Kathy:

Please debit the Thermal-Hydraulics Division's discretionary account for a \$100 contribution for student travel to the Dallas Annual Meeting. In addition, the Executive Committee has agreed to "pre-designate" a similar contribution, also for \$100, to support student travel to Los Angeles for the Winter Meeting.

Thanks for your assistance.

Sincerely,

Alan E. Levin

Dear Alan:

Please develop a recommendation on the attached request for advanced commitments to student travel. I will add this to the agenda of the Dallas Executive Committee meeting as a sub-item under your Treasurer's report. In general this sounds like a good idea to allow for advanced commitments if we are confident of having sufficient resources.

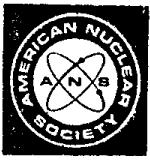

See you in Dallas.

Sincerely,

G. E. Dix

Enclosure (1)

AMERICAN NUCLEAR SOCIETY
EDUCATION DIVISION

May 7, 1987

Headquarters:
555 North Kensington Avenue
LaGrange Park, Illinois 60525 USA

TO: ANS Division Chairs
FROM: W.G. Vernetson, Chairman, Student Activities Committee
SUBJECT: Predesignation of Student Support for National Meetings

At the Washington ANS Meeting, the Executive Committee of the Education and Training Division devoted considerable effort to looking at ways to assure predesignated support for students attending ANS national meetings. Attendance at such meetings is a great means of getting students oriented toward permanent association with the ANS. However, the number of students attending ANS meetings varies from several dozen to over a hundred, usually strongly dependent upon advertised levels of financial support. Unfortunately, the inability to advertise support from meeting to meeting has prevented taking full advantage of the opportunity to have students attend ANS meetings.

We are all aware that students represent a key resource for society growth. Unfortunately, student support to attend national meetings is subject to much variation so the Chairman for the Student Program at a meeting cannot usually advertise even minimal guaranteed support prior to a meeting other than from serving as projectionist assistants. On average students are supported at only pennies per mile. Indeed, when so many students came to the Washington meeting, members of the Student Activities Committee of the Education and Training Division visited most Division Executive Committee meetings to make a special plea for support which was well received. Each division's support was most appreciated and well used by the students.

On behalf of the Education and Training Division, we are requesting that all Divisions consider making two commitments of financial resources to support student attendance at ANS meetings. **First**, provide support for students attending the Dallas meeting. **Second**, appropriate support for the annual meeting in Los Angeles so that the support can be advertised. If each Division will keep this appropriation on its agenda for future meetings, student support can be advertised prior to each meeting to encourage student participation.

A form is included to authorize headquarters to move division funds for student travel support. Thank you for your consideration of this request. If you have questions about this or other student support such as scholarships and student conferences, contact Dr. Gil Brown (617-452-5000), Chairman of the Education and Training Division or myself (904-392-1408). We will both be at the meeting in Dallas.

Sincerely,

William G. Vernetson

Dear Sir:

The American Nuclear Society Student Branch of Texas A&M University is hosting the Midwest Section Student Conference this year. The conference is scheduled to be held from the 26th through the 29th of March. This conference is designed to help students from various Nuclear Engineering Programs across the country interact and exchange ideas and information pertinent to their respective studies in the nuclear field.

For this success, however, a lot of planning, cooperation, and financial assistance is required. We would like your professional division could help alleviate the most pressing concern, finances. Nuclear division of \$100.00 from each of the professional divisions of the American
