A Message from the Chair

Dear colleagues,

I am deeply honored to serve as Chair of our Division for the 2023-2024 term and I wish to thank the division colleagues for all their support. We live in very exciting times. Countries across the globe are acknowledging the pivotal role nuclear power plays in establishing a clean energy mix, driven by the global effort to reduce CO2 emissions. The United States is witnessing strong bipartisan support for nuclear – not only for research but for support towards vendors for reactor development and licensing. Europe has witnessed the formation of the EU Nuclear Alliance, a coalition of 16 countries with an ambitious goal of achieving 150 GW of nuclear energy in the EU energy mix by 2050. Nuclear expansion is strong in Asia, with China leading the way, but also with India, Japan and South Korea commitment to increasing the share of nuclear energy in their energy mix. It is encouraging to note that several countries are reconsidering their past decisions of abandoning nuclear energy or reducing its role. A substantial figure of 40 nations have nuclear power plants either under construction or planned for near future development, with 11 of them venturing into the nuclear realm for the first time. Further, the governments of 16 other newcomers countries are in the decision-making phase for deploying nuclear. New reactor types are being introduced to the market, from large nuclear power plants to small modular reactors, and to the very novel microreactors. NASA, and other space agencies worldwide have launched nuclear programs for propulsion and electricity generation. All these developments signify an exciting time in our field.

This year we celebrated the first in-person NURETH conference post-COVID-19. The success of NURETH-20 was outstanding and I must express deep gratitude to the Technical Program Committee Chair, Dr. Steve Bajorek.
A Message from the Chair

Transitioning to a brighter note, it is my pleasure to announce that the THD honors and award committee has selected Professor Seungjin Kim of Purdue University as the recipient of the 2023 Thermal Hydraulics Division Technical Achievement Award. The Lawrence E. Hochreiter and Vincent J. Esposito student scholarship applications are currently open. With this we aim at promoting and fostering young talent. Students are invited to visit our webpage to apply.

The modernization of our division webpage continues thanks to Trevor Kent Howard's dedicated efforts. The website provides comprehensive details about our activities and upcoming events. In particular, the Executive Committee meeting for the Winter Meeting will take place on Sunday, November 12, in person at 15:30-17:30 EST. Meeting location details are viewable on our webpage (thd.ans.org/meetings/).

We continue to uphold strong technical conferences of which ICAPP2024 and NUTHOS 2024 are the next in line. Excitingly, the NUTHOS conference will be held in-person after a five-year break in Vancouver, Canada in August 2024. The NURETH-21 conference is scheduled for 2025 in Busan, Korea.

On behalf of the Division and committee members, I extend my deepest gratitude to you all for your dedication and support. Please reach out if you want to contribute more directly to our activities or if you have new ideas for what THD should do.

I wish you all a successful year and fruitful discussions at the upcoming ANS Winter Meeting in Washington DC., 2023.

Annalisa Manera
ANS 2023-2024 THD Chair

Standing Committees

Technical Program Chair: Dillon Shaver
Honor & Awards Chair: Xiaodong Sun
Scholarship Chair: W. David Pointer
Nomination Chair: Bao-Wen Yang
Webmaster: Trevor Kent Howard
Membership Chair: Matthew D. Zimmer
Conference Screening Chair: Fan-Bill Cheung
YMG Liaison: Matthew D. Zimmer

His relentless hard work, attention to details, and admirable organizational skills were the backbone of the strong conference's success. Highlights of NURETH-20 will be subject of a special panel session at the upcoming ANS winter meeting. This celebrating session is complemented by two other panels, one to honor the significant contributions of Dr. Hans Fauske, whose recent loss deeply saddened us.

On a sobering note, our membership has continued to decline with a 9.5% drop since last year, most notably among those under 40. We are restructuring our efforts to better engage this age group, enhance the involvement the international community, and foster industry ties. Through the establishment of liaisons with industry leaders and the international community, we aim at nurturing a culture of engagement and encourage the expansion of memberships within these alliances. These liaisons, initiated by my predecessor, stems from our commitment to fostering a diverse community that is reflective of all the facets of our industry, inclusive of age, professional background, and geographical diversity.

Conference Selection Committee

The Conference Screening Committee (CSC) of the ANS Thermal Hydraulics Division has selected the Korean Nuclear Society (KNS) to host NURETH-21 in the city of Busan, Korea, in August 31-September 5, 2025. Preparation for the conference is now well underway.

The next series of the conference, i.e., NURETH-22, is scheduled to take place in 2027 in the United States. The CSC plans to issue a Call for Proposals along with the criteria for proposal evaluation in July 2024.

Technical Program Committee

The THD program committee is pleased to welcome everyone to Washington, D.C., for the 2023 ANS Winter Meeting. The technical program for THD will include a total of 50 summary presentations in 12 technical sessions (out of which 2 are co-sponsored with the ANS MSTD). Also included are 3 THD panel sessions on the Highlights from NURETH-20, Thermal Hydraulics Activities and Opportunities in Industry, and In Memorium: Dr. Hans Fauske. All technical sessions (including panels) sponsored or cosponsored by THD are listed in the table on the right.

We are still looking for volunteers to serve as session chairs or co-chairs, so if you are planning to attend and wish to volunteer, please contact us! A total of 50 summaries were submitted to THD with 132 reviews completed by 42 reviewers. We had an average of 2.64 reviews per submission with reviewers contributing on average 3.14 reviews each of those who participated. Notably, two reviewers contributed 10 or more reviews and we would like to take this opportunity to thank the session organizers and reviewers for their efforts.

The call for papers for the upcoming 2024 ANS Annual meeting in Las Vegas, NV is now open. We expect to have an exciting program with summaries on the following topics:

- General Thermal Hydraulics
- Computational Thermal Hydraulics
- Experimental Thermal Hydraulics
- Experimental Two-Phase Flow
- Computational Two-Phase Flow
- Advanced Reactor Thermal Hydraulics
- Hi-2-Low Multiscale Modeling
• Thermal Striping
• Fluid-Structure Interaction and Multiphysics Coupling
• Machine Learning and AI for Thermal Hydraulics
• Verification, Validation, and Uncertainty Quantification of Machine Learning Models (P)
• CFD and System Code Validation for HTGR Applications Leveraging HTTF Data (P)
• Enabling TH Technologies for Digital Twins (P)
• Thermal Hydraulics: Lightning Talks

The full call for papers can be found here. The meeting will be held June 9th - 12th and summaries are due February 2nd.

At the 2023 ANS Winter Meeting, the THD Program Committee meeting will be held online on Sunday November 5th from 9:00am – 11:00am (EST). It can be accessed here via Zoom. The Password is THDPC2023

As always, we would like to encourage our members to actively participate by attending our meetings, submitting paper summaries, volunteering to organize sessions, and supporting the peer-review of the papers.

Thank You,

Izabela Gutowska
Oregon State University
THD Assistant PC Chair

Dillon Shaver
Argonne National Laboratory
THD PC Chair

Honors and Awards

2023 THD Technical Achievement Award

The Honors and Awards Committee selected Professor Seungjin Kim of Purdue University as the recipient of the 2023 Thermal Hydraulics Division Technical Achievement Award (TAA). Dr. Kim, Professor and Head of the School of Nuclear Engineering at Purdue University, received this award “In recognition of his outstanding contribution towards advancing two-phase flow experimental capabilities, fundamental understanding of two-phase flow transport phenomena, and reactor thermal-hydraulic analysis.”

Prof. Seungjin Kim

Prof. Kim will be recognized at the THD Award Ceremony at the upcoming 2023 ANS Winter Meeting (scheduled to immediately follow the Computational Fluid Dynamics: I session on Monday afternoon November 13, 2023). As a tradition, Prof. Kim is invited to deliver a TAA lecture at a THD-sponsored conference in the near future.

The THD Honors and Awards Committee encourages and welcomes nominations for the TAA. The next deadline for nomination submission is August 1, 2024. The details including the award form can be found at http://thd.ans.org/awards/technical-achievement-award/ and https://www.ans.org/honors/award-technachieve/.

In addition to the TAA, the THD Honors and Awards Committee plans to make the 2023 Best Paper Award selection from the papers presented at the recent NURETH-20 conference. Furthermore, THD re-established a service award, the THD Meritorious Service Award, to recognize an individual for sustained and exemplary service to the nuclear thermal-hydraulic profession. The next deadline for the service award nomination submission is March 1, 2024 (http://thd.ans.org/awards/meritorious-service-award/). These award selections will be reported in the
THD 2024 Spring Newsletter, and the awards will be presented at the 2024 ANS Annual Meeting in Las Vegas, NV.

Finally, we would like to take this opportunity to thank the THD Honors and Award Committee members and all the nominators for their dedicated work! Congratulations to our well-accomplished and deserving colleague!

Scholarship Committee

The American Nuclear Society Thermal Hydraulics Division awards two annual graduate student scholarships: the Lawrence E. Hochreiter Graduate Scholarship and the Vincent J. Esposito Graduate Scholarship.

The Lawrence E. Hochreiter Scholarship was established by the ANS THD in 2019 and first awarded for the 2020-2021 academic year. The scholarship honors Dr. Lawrence E. Hochreiter, pioneer in nuclear thermal hydraulics modeling and nuclear safety analysis at Westinghouse Electric Company and the Pennsylvania State University, who was an active member of the Thermal Hydraulics Division. The scholarship is awarded to a graduate student in nuclear science and engineering who is studying topics related to nuclear thermal hydraulics. This $3,500 scholarship is awarded to one recipient annually.

Eligible students should apply using the ANS Scholarship Program General Application and select the appropriate scholarship(s).

Nominating Committee

The THD Nominating Committee (NC) is responsible for selecting candidates for the division's Executive Committee (EC), standing committees, and division officers. The NC consists of the current Division Chair (Annalisa Manera), Vice Chair (Igor Bolotnov), Program Committee Chair (Dillon Shaver, Ex-officio) and the Immediate Past Division Chair, who serves as the Chair of the Nomination Committee (Bao-Wen Yang).

We welcome anyone who is interested in serving the division in any capacity to contact the division leadership and actively participate in the division activities and volunteer work. We especially encourage the members of the Program Committee (PC) who have shown their dedication and contribution to the PC or other standing committees to apply for the EC positions and other senior roles.

The following is the list of nominations for the 2024 term:

Division Officers Nominations (2024-2025):

Vice Chair/Chair-Elect: Steve Bajorek (NRC)
Secretary: Ferry Roelofs (NRG)
Treasurer: Dillon Shaver (ANL)

Webmaster [2024-2027]: Trevor Howard (OSU)

EC Member Nominations (Term Expires June 2027):
Subash L Shama (UML), Xu Wu (NCSU), Elia Merzari (PSU), Sierra Tutwiler (VCU), Rui Hu (ANL)

Honors and Awards Committee:
- Chair [2024-2027]: Fan-Bill Cheung (PSU)
- Members [2024-2027]:
  - Hisashi Ninokata (POLIMI), Yassin Hassan (TAMU)

Conference Screening Committee Nominations:
- Term Expires [2024-2028]:
  - Xiaodong Sun (UMICH), Van Tichelen Katrien (SCK)

Scholarship Committee
- Chair [2024-2027]: W. David Pointer (ORNL)
- Term Expires [2024-2027]:
  - Victor Coppo-Leite, Ling Zhou (ANL)

Membership Committee
- Chair [2024-2027]: Subash L Shama (UML)
- Members [2024-2027]:
  - Yue Jin (Missouri), Emre Tatlie (Westinghouse), Prashant K. Jain (ORNL), Guanyu Su (UCB), Wei Ji (RPI), Jun Wang (Terra Power), Baris Sarikaya (Constellation).

Bao-Wen Yang
Chair, ANS THD Nomination Committee (2023-2024)

Webmaster report

Over the past six months, the division website has continued to be updated for improved visuals, as well as providing updates to upcoming conferences, deadlines, and events as they relate to the division.

Recent changes were made to the home tabs to simplify the structure and content of the information available on the website. As ANS continues to transition to the new website format, several more changes will be made to the existing website to better serve the needs of the THD community.

Usage statistics contribute to what content goes on the webpage and how it is organized. For over a year now, data has been collected to determine community engagement. During this time, engagement with the website has nearly tripled, and will hopefully continue to increase as the website changes to better meet the needs of our community.

A graph of monthly engagement is presented with THD conference dates (NUTHOS-13, ANS Winter 2022, ANS 2023, NURETH-20) in yellow.

In the past 6 months, the ANS summer meeting and newsletter contributed greatly to website engagement as well as the NURETH-20 conference.

I am excited about what the next six months has in store!

-Trevor Kent Howard
ANS THD Webmaster

Membership report

THD membership currently sits at 947. Membership has dropped ~9.5% since the last newsletter. Based on data from previous years, the largest drops in membership are in the younger age groups (ages 19-39) and student body. These demographics...
make up the vast majority of THD membership and are crucial to the success of the division. Therefore, THD would encourage continued outreach to young members/students within the reader’s organizations. Young members are the future of the division, and their continued involvement is highly valued within.

It is also noted that the international and industry demographics are relatively small compared to the United States and academic groups, respectively. At ANS meetings the international and industry communities are very actively present and represent a significant number of technical papers submitted. There is an opportunity to grow the division by better integrating these communities into the membership. In fact, recent efforts have been initiated to do so by starting liaison programs for each. We hope to see these number grow in the coming years.

Finally, to all members, if you are interested in becoming more involved with the Thermal Hydraulics Division, please reach out or attend an executive committee meeting at the next conference. These meetings are open to all and your feedback on any discussions would be much appreciated.

Matt Zimmer,
Membership Committee Chair

Financial Report

The budget for 2024 has been proposed and approved by the THD EC. Table 1 summarizes the budget and shows how it has changed since 2022. The proposed budget for 2024 does foresee a small loss. This is due to the expected lack of income from our flagship conference NURETH which will not be organized in 2024.
